About

As an aspiring tech professional, I recently made the decision to shift my career from the BPO industry to pursue my passion for software development. I have extensive knowledge in several programming languages such as Python, C#, Java, and even C++. I am always eager to learn and adapt to new technologies, so I am confident that I can easily transition to a different framework or programming language, as required by the role. For more information regarding my skills and work, visit my portfolio website at romenombrejr.com.

My Portfolio

USTC (Mini-Project 1)
